

# Blended Business and Project Management Workshop

---

This workshop ensures a common language, method and globally accepted framework that can be followed by all people (taken by every level of employee working on projects). All businesses can have a common structured approach so things can flow easier and deliverables, budget, schedule, quality and plans are achieved. As more organizations use project-based methods to accomplish tasks, experienced project managers are in higher demand. Our workshop provides a skill-set valued by clients across every industry.

- **Quality & Reputation:** recognized by top Colleges, Government, Associations and Businesses
- **Certifications:** requirements towards PMP and CCA Gold Seal
- **Instructor:** Jason Tratch, globally recognized expert in PM ([www.jasontratch.com](http://www.jasontratch.com))
- **Blended Approach:** In-class component covering the most important concepts; on-line component providing supporting details that students can take anytime at their own pace
- **Practical Component:** work through a project, work with examples & templates, tests, tips
- **History:** content taught for over 10 years with continuous improvement
- **Collaborative Language:** best practices cross-over multiple industries and cultures

## Options Available:

### 1. Business & Project Framework Fundamentals (Day 1)

This workshop ensures you understand the aspects of a project and how to work with others that manage projects. Explains the framework and common language and approach but does not delve into the weeds. Can be a predecessor to the Framework Advanced workshop or can be a stand-alone workshop (higher level). Based on the Global Leading PMBOK ([www.pmi.org](http://www.pmi.org)) with aspects of customized additional methodologies.

### 2. Business & Project Framework Advanced (Day 1 + Day 2)

This workshop ensures you are prepared to manage or lead project tasks within all aspects of a project. For advanced PMs to people that work regularly in project environments. Covers 15 knowledge areas (Scope, Schedule, Budgets, Risk, Procurement, etc.) and how they align with business (brings value not administration). Explains the entire Framework and delves into the tools, techniques, tips and how to use them. Based on the Global Leading PMBOK ([www.pmi.org](http://www.pmi.org)) but also includes customized tools and techniques from decades of direct use in the field (real world templates, tools and examples). Teaches detailed parameters but balances with situational learning and rich media content and interaction.
