

# Workshop Overview

---

## Title: Business & Project Framework

This workshop ensures you are prepared to manage all aspects of a project when complete. For advanced PMs to people that work regularly in project environments. Covers 15 knowledge areas (Scope, Schedule, Budgets, Risk, Procurement, etc.) and how they align with business (brings value not administration). Explains the entire Framework and delves into the tools, techniques, tips and how to use them. Based on the global leading PMBOK ([www.pmi.org](http://www.pmi.org)) but also includes customized tools and techniques from decades of direct use in the field (real world templates, tools and examples). Teaches detailed parameters but balances with situational learning and rich media content and interaction.

This workshop was designed to provide knowledge transfer, tools, and techniques based on best practice concepts, methodologies, and “real world experiences”. Workshop outcome is to systematically increase the “probability of success” for your future projects. Principles of this workshop have been used to manage projects ranging from personal every-day lives to 100 million dollar advanced, high risk projects, and programs. The workshop delivers tools, techniques, processes, checklists and practical knowledge that can be put to work immediately.

### Duration:

The workshop is delivered in 1 to 2 day face-to-face sessions, and also include 90-day access to an on-line course developed by cyber-school experts.
